Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Lesson Plans in Arithmetic Every teacher, every day, should plan her lessons systematically, even if the work is mere drill, but she should always abandon any part of a plan when better methods suggest themselves during the progress of a lesson. In presenting new work, inexperienced teachers are apt to overdevelop. Be wary of long tedious presentations of matter that is beyond the appreciation of young minds, especially in the lower grades. While it is necessary for the teacher to explain and develop new principles, it is more important to follow this up with sharp quick drills, for there is no surer way of finding out if principles are understood. In developing a working principle or explaining a problem, resolve the same into a series of steps and make sure that the class can do the same. The following plan, which may be used in presenting new work in any of the school subjects, lends itself readily to preparatory lessons in arithmetic.
