

Bulletin - United States Geological Survey Volume 309

By Geological Survey

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 edition. Excerpt: .passes directly north of the Union wells, in apparent continuation of the princpal anticline of the hills to the east. It lies considerably south of the point of greatest disturbance in the field, which is apparently in the immediate region of the New England wells. Farther west it possibly merges with the fold which appears south of the fault zone at the east end of the Whittier district. North of this fold are others, both anticlines and synclines, in one of which are the New England wrells and an isolated well of the Union Oil Company. The rocks along the axis of this fold show severe crushing, with indications of considerable displacement. At the head of the east fork of La Habra Canyon the structure again shows marked complexity. Sharp crumples, even faults, exist. The most conspicuous displacement is between the hills on either...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS

This kind of book is every little thing and taught me to looking ahead of time and a lot more. I am quite late in start reading this one, but better then never. I found out this book from my dad and i encouraged this pdf to find out.
