Exalt Publishing. Hardcover. Book Condition: New. Hardcover. 282 pages. Dimensions: 9.2in. x 6.1in. x 0.7in. History of the Solar System; the Universe is infinite and eternal; the Chaotic Destruction of the First Earth; the Gap Theory; the Six Ages of Re-creation; the death of the dinosaurs and reptiles; and how the Moon got married. This book gives scientific proof that the speed of light is not constant as has been assumed for centuries. Calculations go beyond a hypothesis by giving the decay rate of the speed of light as it travels the vast emptiness of space. The scientific impact for this discovery is profound and shocking. Many scientific proofs are given to show why the Big Bang and Redshift Light Theories are not true and the universe is not expanding at an accelerating rate as often claimed. Those who support the Big Bang Theory determine the size and age of the Universe based on observations made by newer telescopes. They observe the amount of redshift in the light from distant galaxies to calculate the distance across the Universe and the corresponding time since the Big Bang. The time and distance seem to match, but this approach is dependent upon the power of our modern telescopes and will fail when new technologies allow us to view beyond the current limits. The Big Bang Theory would have a huge problem if galaxies were discovered in the Universe far beyond our current range of observation. The size and age of the Universe must be increased with each new observation. In other words, the time since the Big Bang would not be finite as it should be if the Big Bang Theory were true. I present the correct scientific reason why light emitted from distant galaxies has a redshift and prove that the size of...
