

Linking Environmental Research to Kenya's Development Agenda

By Joseph Lala

SPS Apr 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x17 mm. Neuware - The expansion and intensification of agro-industrial activities involve increased usage of agrochemicals and other industrial chemicals, with subsequent release of various types of chemical residues which could have adverse effects on water resources, human beings and ecosystem health. For a sustainable development, environmental research and monitoring is needed to protect the environment from pollution in many key areas such as fisheries, water resources, wildlife, public health, agriculture and the natural capital (bio-resources). In order to address the status of the current issues on environment research, monitoring and capacity development in Kenya, a conference entitled 'Environmental Monitoring Research Science and Technology for Sustainable Development in Kenya and Impact on the National Vision 2030.' was organised by the Technical University of Kenya, in conjunction with the Alexander von Humboldt Foundation (AvH) of Germany through its Alumni Programme, in Red Court Hotel Nairobi on 9 - 12 April, 2013. 284 pp. Englisch.

Reviews

This written publication is wonderful. It really is loaded with knowledge and wisdom You will not really feel monotony at at any time of your time (that's what catalogues are for relating to if you ask me).

-- **Desmond Becker**

Absolutely essential go through publication. I am quite late in start reading this one, but better then never. You will not feel monotony at at any time of the time (that's what catalogues are for regarding if you ask me).

-- **Ambrose Thompson II**
