DANCING SATELLITES

To download **Dancing Satellites** PDF, make sure you click the link beneath and download the file or get access to additional information which might be relevant to DANCING SATELLITES ebook.

Books On Demand. Paperback. Book Condition: New. Paperback. 56 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. DANCING SATELLITES by Prof. (em) Alfred Evert Gravity makes the apple fall down. That gravity constant commonly is applied on all masses of the universe. However, the calculation only matches if additional 95 masses are added by fictive Dark Matter and Energy. Already at geostationary satellites, the calculation won't fit: the earth is able to force satellites into circle track at height of about 42000 km if they are moving by 3 kms. In reality however, they fly ten times faster through the space and thus show hundredfold stronger inertia. Also the sun can not keep these satellites on the demanded track, because their velocity varies by - 10 every day. Above this, it's unsolved why satellites for earth observation stagger around the earth at S-shaped tracks and why satellites at polar orbit are eastward drifting continuously. A second problem results from the idea, at the one hand would exist the material and at the other hand the vacuum. Each material particle would dissolve immediately into the surrounding absolute void. It's not conceivable how previous gravity could affect attracting forces through the nothing of space. At early times one did agree in the existence of light-aether of high density, so transport by light speed would be possible. However now it was not clear, how e. g. the solid earth could move through that thick soup. So one appreciated when Einstein eliminated the aether. However one still ignores, Einstein stated the necessity of the existence of an aether in later years quite clearly. The (absolute new) solution of that dilemma is simple: really existing is only one unique substance and all other appearances are each special motion pattern of aether within the aether. So no solid...
