SPINE SURGERY BASICS

To read **Spine Surgery Basics** PDF, remember to click the button listed below and save the file or have accessibility to additional information that are in conjunction with SPINE SURGERY BASICS ebook.

Book Condition: New. Publisher/Verlag: Springer, Berlin | This volume shares vital insights gained by its expert authors during years of surgical experience. As well as detailing a wealth of surgical options in varied contexts, it includes background material on pathology, diagnosis, and non-invasive treatments. | Spine surgery has increasingly become a surgical field of its own, with a distinct body of knowledge. While available textbooks cover the intricacies of spine surgery and provide extensive information on each pathology, these books are not geared towards the requirements of the novice and are insufficiently portable for the busy resident to carry while on rounds or on call. This easy-to-use book, written by acknowledged experts, is designed to meet such needs by providing essential information on spine pathology, diagnostic evaluation, surgical procedures, and other treatments. After an opening general section, degenerative spinal disease, pediatric spine conditions, spine trauma, spine tumors, infections, inflammatory disorders, and metabolic conditions are all discussed in more depth. Alongside description and evaluation of surgical options, important background information is included on pathology, presentation, diagnosis, and nonsurgical treatments. Potential complications of surgery are also carefully considered. Spine Surgery Basics will be an invaluable practical aid for all who are embarking on a career in spinal surgery or require a ready reference that can be consulted during everyday clinical practice. | General: Anatomy.- Physical Exam: Cervical.- Physical Exam: Lumbosacral.- Imaging Basics (basics of anatomy on radiographic imaging plus bone scans, DEXA, etc.).- Diagnostic Evaluations (injections, EMG, etc).- General Surgical Principles (guidelines for informed consent, patient positioning for surgery, equipment needed, post operative considerations).- Surgical Approaches.- Cervical and Thoracic Instrumentation.- Lumbar and Lumbosacral Instrumentation.- Bone graft and Bone Substitute Biology.- Neuromonitoring. Degenerative Spine: Cervical Disc Herniation and Radiculopathy.- Cervical Stenosis and Myelopathy.- Thoracic Disc Herniation.- Lumbar Disc Herniation.- Lumbar Spinal Stenosis.- Lumbar...
