

The Year-Book for Colorists and Dyers Volume 7

Filesize: 6.27 MB

Reviews

This ebook can be worthy of a read, and much better than other. I have read and i am certain that i am going to planning to go through again once again in the future. You may like just how the writer compose this book.

(Mr. Grant Stanton PhD)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1905 Excerpt: .solution, and a mixture of the thiosulphate and sulphite solution has been found superior to any other thus far tried. In making use of any of the above solutions the skin may be introduced directly from the bate after washing, or it may be prepared in any desired way. Thus, if a skin is only partly tanned by vegetable or mineral tanning material, the tanning may be completed in any of the above baths of chromic-oxide salts. SUBSTITUTE FOR SHELLAC. Carl Ludwig, of Schonberg, Germany. Patent No. 760,541, dated May 24, 1904. The product essentially consists of cheap resins soluble in alcohol, being mixed with oleic acid and saponified by boiling with alkali hydroxide and decomposed by acid. The precipitate obtained after being washed and dried is the new product, which can substitute shellac for the purpose of polishing. Further, the work with the new product is cleaner than that with common shellac. The covering made by polishing is harder, so that it is more capable of resisting scratching. The work of polishing proceeds quicker, owing to the hardness of the covering, and the workman uses up less polishing material. The pores of smoothplaned wood do not become clogged by the new product, as happens with shellac. ORGANIC ACID FROM BEET-ROOT MOLASSES AND PROCESS OF MAKING SAME. Hermann Schrader, of Honningen, Germany. Patent No. 761,412, dated May 31, 1904. This invention relates to the organic acids to be obtained from the final beet-root molasses derived from sugar...
