

Mathematical Questions and Solutions, from the Educational Times. Volume 18

Filesize: 5.44 MB

Reviews

This is actually the best ebook we have read till now. Indeed, it can be enjoy, nevertheless an interesting and amazing literature. You will not feel monotony at whenever you want of the time (that's what catalogs are for regarding should you question me).

(Jamar Stracke)

MATHEMATICAL QUESTIONS AND SOLUTIONS, FROM THE EDUCATIONAL TIMES. VOLUME 18

DOWNLOAD

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1873 edition. Excerpt: .is fired at random from a gun, with a given velocity; find the average of its range. Solution by the Proposer. If θ be the elevation of the gun, and h the height due to the velocity, the range is $1h \sin 2\theta$. The number of presentations of the gun at an elevation θ is proportional to $\cos \theta$, supposing every elevation to be equally probable; hence the mean range is 3817. (Proposed by M. Collins, B.A.)--A body will describe a circle by a force $= v^2 r / l$ directed towards its centre. Hence prove that if a circle be drawn round any other interior point C as centre of attraction, the force of attraction towards C must vary as PC^{-3} (the cube of the distance of P from the polar of C); P being any position of the point moving in the circumference; and show that this last property is true for all conic sections. Solution by J. J. Walker, M.A. 1. Let CT be the perpendicular on the tangent at P , and O the centre of the circle. If f be the force along PC , its component along PO must be CT / CP equal to f ; that is, $f \cdot CP = CT$, or $f \cdot CJ^3 = Qp$. But in the circle CT is to the perpendicular from P on the polar of C as CO to radius; therefore, c . 2. Let K be the centre of a conic, and KL , KM the semi-diameters conjugate to the directions...
